

SUNDAR ABBAS

FULL-STACK WEB DEVELOPER | PYTHON & REACT | AI ENGINEER

ABOUT

I am a 7th-semester student at Gomal University with a deep passion for building scalable web applications. Over the last 2+ years, I have evolved from a beginner coder into a developer capable of handling full-stack deployments. My professional experience includes a 6-month tenure at Techfairy. I also collaborated with Oneair Company, where I successfully revamped their website and managed full-stack deployment (frontend + backend). I am currently sharpening my skills in Python (Django/Flask), React.js, and Tailwind CSS. I am actively looking for an internship or developer role where I can solve real-world problems, contribute immediately, and continue learning from senior engineers. Let's connect!

WORK EXPERIENCE

TechFairy

AUG 2025 - MAR 2026

Web Developer

(8 MONTHS)

- Designed and developed a full-scale ERP system using Php (Laravel), MySQL, and JavaScript.
- Architected the complete database schema and backend business logic to streamline internal company workflows.
- Maintained clean, modular code using Git for version control throughout the SDLC.

OneAir Company

Jan 2026 - Feb 2026

Web Developer

(2 months)

- Led frontend in React.js and backend in Laravel development and deployed the company's official website to production.
- Resolved critical UI/UX issues and improved overall site performance.
- Collaborated directly with management to implement custom feature requests.

KEY AI PROJECTS (PORTFOLIO)

- AI Weather Assistant | Streamlit, LangChain, Groq API, OpenWeather API (an intelligent weather app provides real-time data and AI-generated travel advisories based on city) [🔗 Live Demo](#)
- DocuMind (RAG PDF Chatbot) | LangChain, Groq API, ChromaDB, Streamlit (Developed a RAG-based system allowing users to upload PDFs and ask context-aware questions using vector search and Groq's Llama 3.3 model.) [🔗 Live Demo](#)
- AI Blog Generator | Django REST, React.js, LangChain, Groq API (Built a full-stack application that generates structured blog posts on any topic using custom AI prompt chains.)
- Omni Chatbot | Streamlit, LangChain, Groq API (Created a general-purpose conversational AI with multi-turn context retention and memory.) [🔗 Live Demo](#)

EDUCATION

B.S. in Computer Science

2023 - Present

Gomal University (Affiliated College), D.I. Khan

(7th Semester)

CGPA: 3.90 / 4.00

Data Structures and Algorithms
Web Development
Database Systems
